

# LEUPOLD® MARK 4® 20-60x80mm TACTICAL SPOTTING SCOPE

Absolute ruggedness, 100% waterproof, low overall weight, and impeccable optical quality: the four key features you'll find in Leupold Mark 4 20-60x80mm Tactical spotting scopes. The Leupold Mil Dot or TMR reticles matches those found in Leupold Mark 4 riflescopes, allowing both for range estimating and for the spotter to view the same sight picture as the shooter. Index Matched lenses and a light absorbing interior finish to suppress glare offer an extraordinarily crisp and bright image. Leupold's efficient Folded Light Path (FLP) lens and mirror optical system offers an effective optical path of a scope nearly twice its length. Generous, long eye relief offers both ease-of-use and

comfort even during prolonged viewing. An expansive field of view, even at maximum magnification, provides easy tracking and location of targets. The armored magnesium body is extremely durable while remaining very light, making this the ideal spotting scope for any field condition. Leupold's nitrogen charging and sealing technology guarantees absolute waterproof performance. A form-fitting, fully padded soft-side case with easy access panels that negate the need for lens covers and which remains on the scope at all times is included. Leupold Mark 4 spotting scopes are covered by the Leupold Full Lifetime Guarantee.

## LEUPOLD® MARK 4® 20-60x80mm TACTICAL SPOTTING SCOPE
